Introducing **POWER 2 NATURE®**

We create natural solutions for the food and beverages industry. Our natural expertise, together with natural heritage and our wide fruit portfolio, allows Prodalim to introduce the **POWER 2 NATURE®** for all category activities.

We create customized and natural solutions for our customers worldwide. With a fully flexible approach to processing and manufacturing, we enable new opportunities for collaboration and sustainable product innovations.

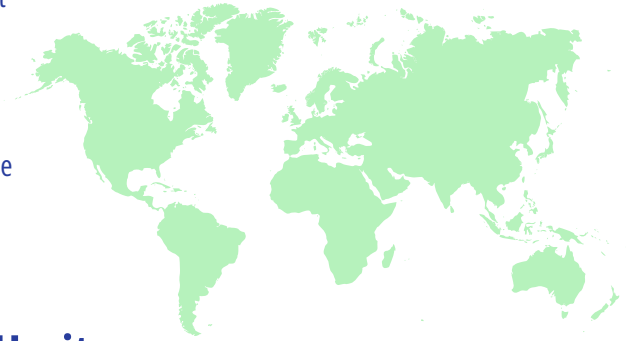

The 6 key components of the **POWER 2 NATURE®** are:

1 Natural Expertise

More than 30 years of expertise and knowledge in raw material sourcing & processing

From the early beginnings in 1987 as juice trading company to a global player in the juice and beverage industry, Prodalim nowadays offer a wide range of services: from sourcing, manufacturing and blending to product development and compounding. Prodalim has developed to be a full solution provider for the industry delivering services from the field to the consumer.

2 Natural Heritage

A growing repertoire of natural ingredients

Prodalim is one of the leading processors and suppliers of citrus fruits like orange and grapefruit globally; making citrus a core product that has been with the company since the very beginning. Tropical fruits such as pineapple, guava, passionfruit and mango have always been an important pillar of our natural fruit portfolio with fully integrated supply chains.

In 2022, we extended our fruit portfolio by adding red fruits through the acquisition of Rauner GmbH based in Germany. Fillers such as apple and grape complement our selection of raw materials.

3 Natural Portfolio

A focus on natural cores

Prodalim's compound portfolio offers a wide range of natural products to choose from: Starting with beverages evolving around our natural core: NFC, juice concentrate blends, smoothies and nectars to multis and juice based beverages.

We recently extended our portfolio by Water Plus combinations, CSDs with juice, Sports Drinks, Fruit Wines, Tea Drinks with or without alcohol and Radlers.

All these ready to market concepts are in line with the latest consumer and market trends.

4 Using The Maximum Power Of Nature

Upscaling fruit side streams

At Prodalim we emphasize on sustainable procedures and processes which are optimized to capture all that nature has to offer. Through a fully integrated and complete value chain, we support our customers in every step of the way: from fruit processing to the creation of innovative beverage concepts. Via our backward integrated approach, we capture not only the juice of a fruit, but nearly every single element: such as oils, aromas, water phases and cells which can be used for new product developments and innovations.

5 Naturally Flexible

A modular and a flexible approach for customized solutions

Thanks to our long term expertise in raw materials including an excellent global network & backward integrated solutions, we have access to the best raw materials and process capabilities: an ideal basis for state of the art juice building blocks to be combined with natural ingredients or fortifiers such as vitamins, minerals and others to develop tailor made applications. We follow an unique modular approach to maximize the benefit our cooperation with our customers.

6 Natural Innovations & Category Development

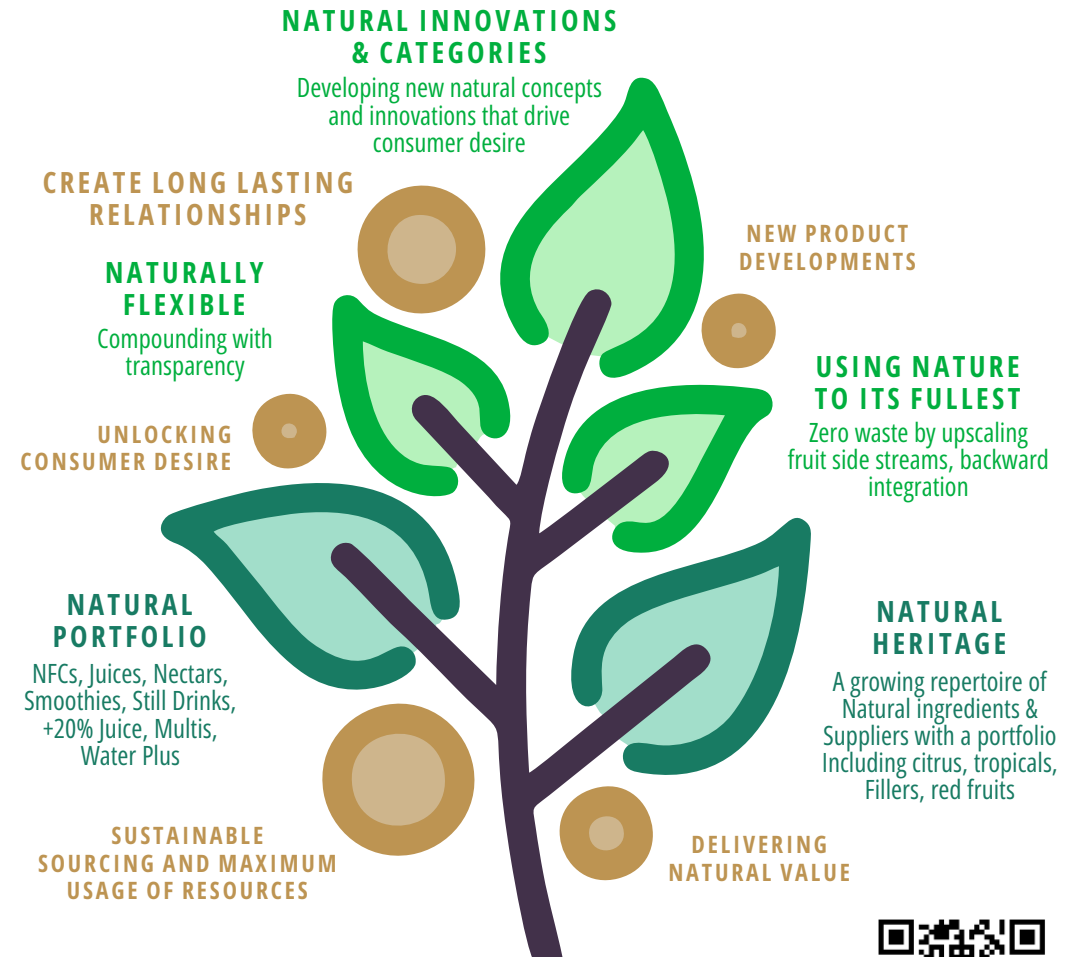

Introducing new product concepts by Prodalim

No matter what ideas our customers have, we at Prodalim inspire our customers' project pipeline and compose tailor made developments in close cooperation and in line with the current trends.

We dispose of the right portfolio of raw materials and compounds as well as ideas for go to market concepts.

We are vertically integrated through the supply chain:

- Vast suppliers network
- Processing & blending sites
- Innovation & applications centers
- Compounding & aroma creation
- Global distribution

From The Field To The Consumer

Our Certificates & Memberships

Our business agenda includes full compliance with labor and human rights, ethical standards, health and safety, quality and environment.

To make sure that these principals are withheld and communicated across different forums and platforms, we participate in initiatives such as Sedex, Rainforest Alliance, FairTrade and Ecovadis. We are also ISO 9001 certified and SGF members.

Sustainability & Goals

We are committed to using resources responsibly, avoiding their exhaustion so that those resources can be preserved to meet the needs of future generations. Our promotion of sustainable development includes the rational use of natural resources, and the commitment by each and every one of our employees to take the necessary steps to use those resources efficiently and responsibly while promoting their conservation and preservation. Prodalim also encourages its partners and suppliers to share the same commitment and respect for the environment and the needs of local communities and delineates expectations in its code of conduct.

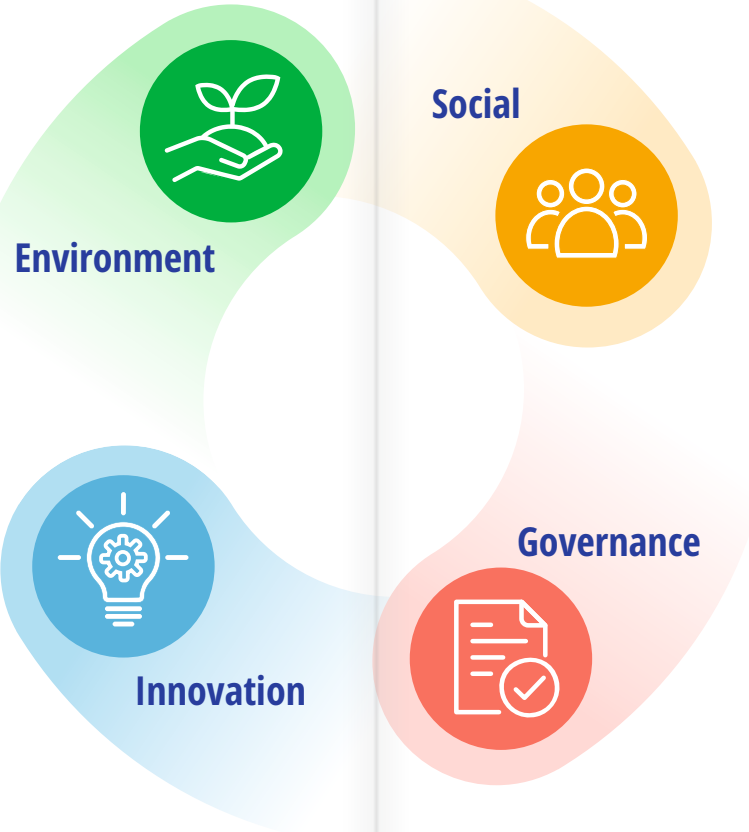

We are supporting a healthier world

Sustainability & Goals

Goals	2025 Targets	2030 Targets
GHG emission Reduce our absolute GHG emission across the value chain	10% reduction over the 2020 baseline	Total of 20% reduction over the 2020 baseline
Renewable energy Achieve energy efficiency by changing to renewable energy* in all our sites	100% renewable energy in at least half of our sites	100% renewable energy at all our sites
Water Reduce water usage per tone product	10% reduction in water usage	20% reduction in water usage
Packaging Material to be reusable, recyclable, compostable, or biodegradable	50% of packaging material to be reusable, recyclable	100% of packaging material to be reusable, recyclable, compostable, or biodegradable
Waste Reduce waste-to-landfill intensity across our production facilities	10% reduction	25% reduction

* Sun, wind, biomass, hydropower

Goals	2025 Targets	2030 Targets
Sustainability driven collaborations Focus on innovation and technology which promote sustainability	15% of our acquisitions and FoodTech partnerships to be driven by sustainability topics	35% of our acquisitions and FoodTech partnerships to be driven by sustainability topics
Nutritional products Implementing technologies driven by improved nutritional properties	10% of our products will obtain positive nutrition aspect	25% of our products will obtain positive nutrition aspect
Reduce food loss Utilization of fruit products such as peels, core and seeds to extract secondary and tertiary fraction	10% of fruit waste will be Reprocessed into other products	30% of fruit waste will be Reprocessed into other products

Goals	2025 Targets	2030 Targets
DE&I (Diversity, Equity & Inclusion) Achieve and sustain gender equity in management positions	Achieve and sustain 35% of women in management positions	Achieve and sustain 50% of women in management positions
Community relations Implement a global social involvement program to support the local communities	Involvement programs within the local communities in all our sites	
EHS Zero accident culture. Reduction in Total Recordable Incident Rate (TRIR)	10% reduction	35% reduction

Goals	2025 Targets	2030 Targets
Stakeholders dialogue Implement and sustain a transparent and consistent stakeholders dialogue	CEO open door policy as part of a transparent dialogue with our stakeholders Initiate mutual learning meetings once a month with chosen stakeholders	
Code of Conduct & Ethics	Updating the code of conduct and extending it to 100% of suppliers signing on it	
Sustainable supply chain Promoting a sustainable supply chain focusing on the reduction of GHG emissions (Scope 3), fair employment conditions, DE&I	25% of our active suppliers collect their GHG emissions and obtain a sustainability strategy	50% of our active suppliers collect their GHG emissions and obtain a sustainability strategy
Sustainability leadership committee Establish a committee that will oversee, approve and be a part of the sustainability projects	Quarterly meeting for updates and discussions on sustainability topics	
Transparency & Traceability	Publish the first sustainability report by the end of 2024, approved by management and BOD	

Prodalim will invest 10% of its profit in innovation projects that will help create a positive impact on sustainability. Prodalim aims to publish its first sustainability report during Q1 2024, in which more information on progress towards achieving this target will be shared.

360° Approach To Compounding

Our Approach To Compounding

Experts in juice building blocks

Due to our excellent access to the best raw materials and process capabilities, we create state of the art juice building blocks to be combined with natural ingredients for tailor made applications. We integrate our own raw material portfolio in winning and ready to market concepts. The building blocks are an essential pillar to develop complex ingredient systems according to our customers' needs and demands.

Maximum transparency for customized solutions

Prodalim relentlessly focuses on innovative solutions along the entire agile supply chain to unlock the desire in juice based beverages. As we control every single step from the harvesting and processing of the fruits, to the ready to drink product, Prodalim offers a maximum of transparency along the entire supply chain.

Holistic & flexible approach

We follow a holistic approach for all our compounding activities: The consumers' needs and demands are the heart of our business. In order to achieve an unique and positive customer experience, we take all the different aspects into consideration: whether it is to find the right raw materials and ingredients, to develop together with our customers a customized recipe, whether it is regulatory or technical advise, Prodalim can be your partner of choice for a winning end to end product solution.

Citrus Fibers

Dietary fiber can replace the use of synthetic products, sugars, gums, and oils, such as pectin, carrageenan and xanthan gum. With natural thickening properties, it improves the texture, stabilization, and emulsification of foods, as well as contributing to a healthy daily life. It is the only one on the market that does not generate effluents, complying with the ecological requirements for clean-label products. Considered an innovative, high-quality natural product, it is a market and consumer trend. Projections suggest that the global demand for such integral ingredients is poised to burgeon by 50 percent in the forthcoming decade.
